Hechanova and Waeldle suggest that there are five key components of diverse cultures that have implications for mental health professionals. While the authors make their arguments in the specific context of disaster situations in Southeast Asia, their comments provide a framework to begin the discussion of cultural diversity and mental health. Several cross-cutting issues are discussed, including acculturative stress and protective factors within cultures; the roles of religion and spirituality and the family in culturally sensitive interventions; different manifestations and interpretations of distress in different cultures; and the impact of stigma and cultural distrust on help-seeking. The needs for culturally sensitive and 06/08/2009 · It is also an entree to “cross-cultural” practice. Read More · Who is EthnoMed for?
